WE ARE Fiberlink IT Solutions

Fiberlink IT Solutions LLC, a full service IT company set up to offer affordable, understandable IT support to people and businesses in and around Middle East.

We do whatever you need us to, when you need it done. Well, anything IT related anyhow. From purchasing hardware, right through to ongoing support, we've got it all covered.

We'll work with anyone that needs us. Whether you're working from home or in an office, we'll be happy to have a chat about what you need, then meet up with you face-to-face to work out how best to solve your problems.

Vision

Our vision is to be the leading provider of cutting-edge IT solutions, empowering businesses to achieve their full potential in the digital age.

Mission

Our mission is to provide reliable, secure, and scalable IT solutions that enable our clients to streamline their operations, improve productivity, and stay ahead of the competition.

Why Fiberlink IT

At Fiberlink IT, we are proud to offer comprehensive services that meet your needs. Our team of experienced professionals has its own department for data center solution, security solution, ELV solution, audio and video integration, and cloud service. As a result, you can rest assured that our solutions are designed to provide the highest levels of security, reliability, and scalability.

Our commitment to excellence ensures that your network, AV, security, and cloud solutions are tailored to your specific needs.

Networking Infrastructure Services

Data Center Infrastructure

At Fiberlink, we understand the importance of reliable and secure data centers. That's why we offer a range of data center services to help organizations of all sizes meet their unique needs and requirements. From design and implementation to maintenance and upgrades, we've got you covered.

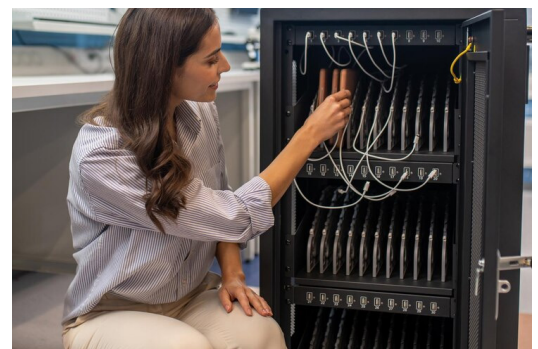

Build A New Data Center

Setting up a data center can be a complex and stressful process, but it doesn't have to be. At Fiberlink, we believe that your data center should be a source of peace of mind, not a source of frustration. That's why we offer a tension-free data setup process that is designed to take the stress out of data center implementation.

Shifting / Relocating Data Center

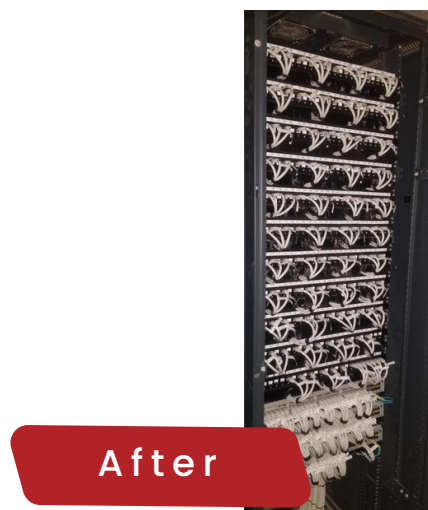

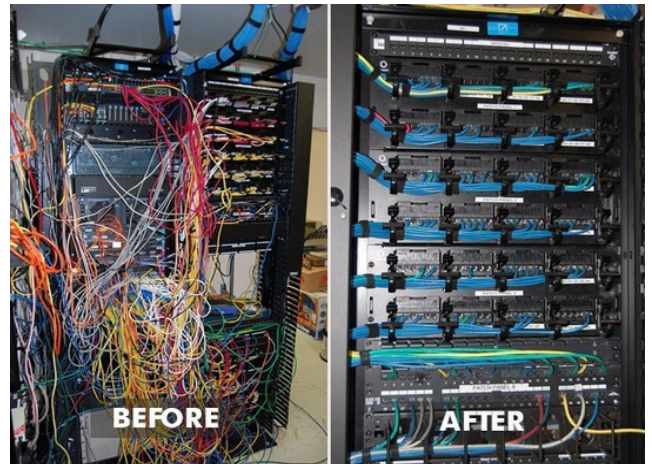

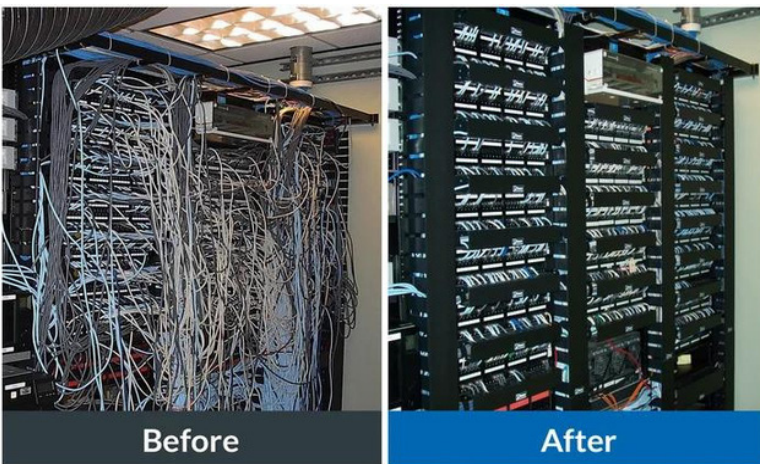

Data center shifting can be a complex and challenging process, but with Fiberlink, you can be confident that your transition will be smooth and stress-free. Our team of experts will work closely with you to understand your needs and requirements, and develop a customized plan for your data center shift.

IDF Revamping/ Cable Organizing

IDF Revamping / Cable Organizing

Experience a network transformation with Fiberlink's IDF Revamping and Cable Organizing solutions. Say goodbye to tangled cables and inefficiencies as we streamline your infrastructure for optimal performance and reliability. Our expert team will revamp your IDF setup, ensuring a neat and organized environment, reducing downtime, and enhancing overall network efficiency. Elevate your network operations with Fiberlink's cutting-edge solutions today.

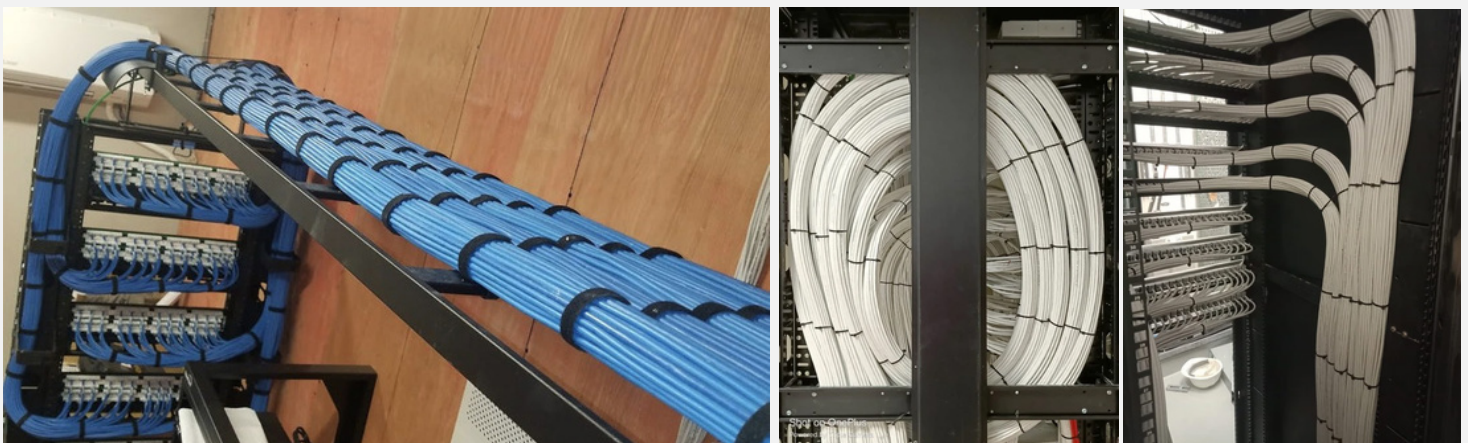

ELV – STRUCTURED CABLING DATA & VOICE

ELV – Structured cabling DATA & VOICE

Fiberlink provides complete structured cabling solutions, including design, installation, and maintenance services (User side face plate fixing , panel side cable organizing , termination and fluke testing). Our goal is to help you build a secure and reliable network infrastructure that supports your business needs.

Our team of certified professionals has extensive experience in designing, installing, and maintaining structured cabling systems. We use only the best quality cabling and components, and adhere to industry-standard installation practices to deliver superior results.

We understand the importance of a well-functioning network infrastructure, which is why we provide ongoing support and maintenance services. Our goal is to ensure that your network remains up-to-date, secure, and running at peak performance, so you can focus on growing your business.

FIBER OPTIC SOLUTIONS

ELV – Structured cabling DATA & VOICE

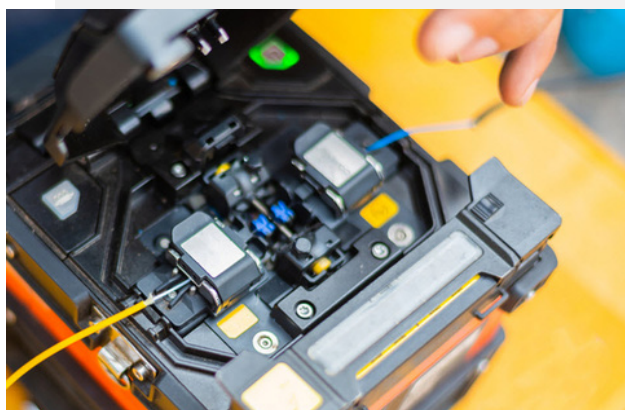

Fiberlink provides a comprehensive range of fiber optic services, including outdoor and indoor cabling, splicing, and OTDR/OLTS testing. At our company, we are committed to providing high-quality fiber optic solutions that are customized to meet the specific needs of our clients. Contact us today to learn more about how we can help you design, install, and maintain your fiber optic network.

SECURITY SOLUTIONS

Secure your premises with our comprehensive security solutions, including CCTV, door access, gate barriers, and queue management.

CCTV

Monitor your premises with our advanced CCTV solutions, providing high-quality video surveillance, motion detection, and remote access for enhanced security.

Door Access

Control access to your premises with our door access solutions, featuring secure biometric or card-based authentication, anti-passback, and audit trails for a complete access control solution.

Gate Barrier

Monitor your premises with our advanced CCTV solutions, providing high-quality video surveillance, motion detection, and remote access for enhanced security.

Queue Management

Control access to your premises with our door access solutions, featuring secure biometric or card-based authentication, anti-passback, and audit trails for a complete access control solution.

PABX

Efficient Communication for Your Business

Our PABX systems offer a reliable and efficient communication solution for businesses of all sizes. We provide installation, maintenance, and upgrades to ensure optimal performance.

Installation

Our team provides professional installation of PABX systems to ensure smooth operations. We will work with you to understand your communication needs and install the system to meet those needs.

Maintenance and Support

We provide ongoing maintenance and support to ensure your PABX system is always up and running. Our team of experts is available to provide remote or onsite support whenever you need it.

Upgrades and Integration

We also provide upgrades and integration services to enhance the functionality of your existing PABX system. Whether you need to add new features or integrate your system with other technologies, we can help you optimize your communication system.

Customized Solutions

We offer customized PABX solutions to meet the unique communication needs of businesses of all sizes. Our team of experts can assess your business requirements and recommend a solution that will work best for you.

Training

We also offer training to ensure your staff is fully equipped to use your PABX system. Our team can provide training sessions to help your staff understand the features and functionality of your system, making it easier for them to use it effectively.

A person is seen from the side, sitting at a desk and working on a laptop. The scene is set in a modern office with large windows overlooking a city at night. The image is overlaid with a digital aesthetic, featuring glowing lines and data points. The text "BUSINESS TECHNOLOGY SERVICES" is prominently displayed in the center.

BUSINESS TECHNOLOGY SERVICES

AUTOMATION

Our automation services provide seamless control of your home or office, from lighting and temperature to security and entertainment.

Home Automation

Control lighting, temperature, and security with the touch of a button or voice command.

Office Automation

Increase productivity and streamline operations with automated lighting, temperature, and audio/visual systems.

Custom Automation Solution

Our team can design and implement customized automation solutions to meet your unique needs.

AV INTEGRATION

The lighting system of the conference room is another factor that completes any meeting or conference. To design the system, one must consider both the function and beauty that align themselves with the interior design.

What We Provide

We understand the importance of quality and reliability, which is why we only use the finest materials and cutting-edge technologies in our projects. From high-definition displays and advanced control systems to powerful speakers and cutting-edge projection systems, our AV solutions are designed to deliver the best possible performance, every time.

CLOUD SERVICES

Transform your business with our cloud solutions, offering scalable and secure cloud infrastructure, cloud migration, and cloud-based applications.

Cloud Consulting

Cloud consulting is a type of consulting service that focuses on helping businesses and organizations adopt cloud technologies to improve their operations, processes, and outcomes.

Private Cloud Services

Private cloud services are cloud computing services that are dedicated to a single organization or company. In a private cloud, the computing resources, such as servers, storage, and networking, are isolated and not shared with other users.

Public Cloud Services

Public cloud services are cloud computing services that are delivered over the internet by third-party providers to multiple users or organizations.

Cloud Training

We provide tailored programs to help employees upskill and improve their understanding of cloud computing technologies.

POS

Our POS services provide an all-in-one solution for businesses of all sizes. From small retail stores to large restaurants and bars, our systems help you process payments, manage inventory, and keep track of sales data. Our POS solutions are user-friendly, customizable, and designed to fit the unique needs of your business.

Consultation

We'll meet with you to understand your business needs and recommend the right POS solution.

Installation

We'll install the POS hardware and software, set up your menu or inventory, and configure your payment processing.

Training

We'll install the POS hardware and software, set up your menu or inventory, and configure your payment processing.

Support

We offer ongoing technical support and maintenance services to ensure your POS system runs smoothly.

BUSINESS SUPPORT SERVICE

Our business support services are designed to help you optimize your operations and improve your overall business performance. Whether you need highly skilled engineers to handle your day-to-day operations, professional IVR recordings to enhance your customer experience, or expert website and media management services to elevate your online presence, we have the right solutions for you.

IVR Recording

Our professional IVR recordings can help you create a more personalized and engaging customer experience, while improving your call center efficiency. With our IVR recording services, you can ensure that your customers receive a professional and consistent experience every time they interact with your business.

Website

We understand that your website is your online storefront, and we work closely with you to create a website that reflects your brand and meets your business objectives. Our experienced designers and developers use the latest technologies to create a website that is userfriendly, responsive, and optimized for search engines.

SOFTWARE

Our software solutions are designed to help businesses achieve their goals through improved productivity, streamlined operations, and enhanced decision-making. Whether you need a custom software solution tailored to your unique business requirements, a comprehensive ERP system to manage your entire business, or an intuitive invoice system to simplify your payment processing, our expert team can deliver the right solution for your needs.

Custom Software

Streamline your operations and increase productivity with our custom software solutions, tailored to meet your unique business requirements, and developed using the latest technologies.

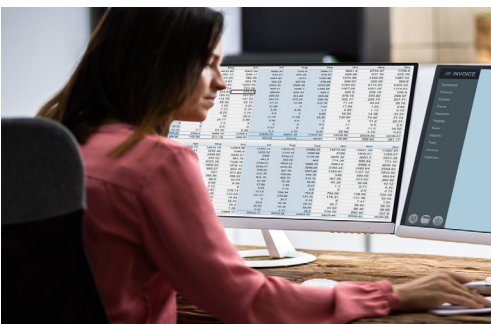

ERP Softwares

Optimize your business processes and enhance decisionmaking with our comprehensive ERP software solutions, featuring advanced functionalities such as financial management, supply chain management, and human resource management.

Invoice Systems

Simplify your invoicing and payment processing with our intuitive invoice systems, featuring customizable templates, automated workflows, and real-time monitoring, ensuring accurate and timely invoicing and payment collection.
